Soft-Skills

- Teamwork
- Responsibility
- Assertiveness
- Resilience
- Stress management
- Work under pressure
- Self taught
- Discipline
- Perseverance

Languages

English - B2

Spanish - Native

Backend Developer

Java | JavaScript | SpringBoot | Node.js

I'm a backend developer specialized in Java (Spring) and Node.js, with a strong focus on building scalable and efficient systems. I'm currently training in cybersecurity and DevOps to implement better security practices and optimize system infrastructure.

I co-founded Atomicat-tech, a startup focused on delivering tailored tech solutions. While I'm no longer part of the company, the experience strengthened my ability to lead multidisciplinary teams and contribute across all stages of software development.

Technology is a constantly evolving field that drives me to keep learning and improving every day. I'm looking for opportunities where I can bring my backend expertise, strategic mindset, and passion for innovation to drive impactful and challenging projects.

Experience

August 2024 - May 2025

Backend Developer and co-founder Atomicat- tech

- I designed and implemented entities and database connections, I also deployed the backend of different projects. In addition, I worked as Product owner of some of the projects, attracting customers, analysing and surveying the requirements of the projects.
- **Tools used:** Springboot, SpringSecurity, AWS, Docker, Mysql, NodeJS, JWT,JIRA, Postman, Agile Methodologies.

March 2024- June 2024

Professional practice No country

- I worked with two different teams as a backend developer. The first time I created entities and mysql database connections. The second time, I worked on the deployment of the cloud database and the backend of our WebApp.
- **Tools used:** SpringBoot, Mysql, JPA, Postman, Docker, AWS, JIRA, Agile Methodologies.

Education

Programming Technician- Universidad Tecnologica Nacional (2024-Currently)

Full Stack developer - Mar del plata programa (2023)

Web Programming - Oracle next education/ alura latam (2022)

Technician in Application Analysis and Development- ISET (2017-2018)

Cursos adicionales

Java - Udemy (2021)

PHP - Hilet (2018)

Hackaton - ATICMA(2023)

Languages

- Java
- JavaScript
- C
- Typescript

Frameworks

- SpringBoot
- SpringSecurity
- React
- NodeJS
- Express

Databases

- MySQL

Software architecture

- Microservices
- Monolithic

Devops & build

- Docker
- Maven
- Amazon web services
- Git
- CI/CD
- Render/Vercell

Testing & Auth

- Junit
- Autentication with JWT

Tools

- JIRA
- Postman
- IntelliJ
- VS Code

I am available for interviews and open to challenges that allow me to continue growing as a backend developer and contribute value to impactful technology projects.
